WŁOCHY

Dear Professor Santacroce,

We are happy to inform you that the Polish Academy of Sciences, considering your long-lasting and very fruitful collaboration with Polish scientists, awarded you the **Copernicus Medal** - the highest prize granted by the Academy to foreign researchers for their contribution to the Polish science.

In particular, the Academy highly appreciated your engagement in working out, together with researches from our Institute, the Demographic and Socio-Occupational Atlas in Poland. Without your friendly assistance and devotion to the project, the creation of the Atlas would be impossible.

The Academy authorized our Institute to settle the date the award could be handed over to you in Warsaw. So, please, let us know what your preferences are in this respect.

With congratulations and best regards.

Sincerely yours,

DYREKTOR INSTYTUTU

prof. dr hab. Maria Wieruszewska
